

```
// Task 01 ; Grandfather → Father → Son (Multilevel Inheritance)

class Grandfather {
    void company() {
        System.out.println("Grandfather's company is: ABC Ltd.");
    }
}

class Father extends Grandfather {
    void car() {
        System.out.println("Father's car is: Toyota Corolla");
    }
}

class Son extends Father {
    void hobby() {
        System.out.println("Son's hobby is: Playing Football");
    }
}

public class FamilyMain {
    public static void main(String[] args) {
        Son mySon = new Son();
        mySon.company();
        mySon.car();
        mySon.hobby();
    }
}
```
