```java
// Task 02: IDCard Class with Constructor

class IDCard {
    String name;
    int id;
    String department;
    String institution;

    IDCard(String name, int id, String department, String institution) {
        this.name = name;
        this.id = id;
        this.department = department;
        this.institution = institution;
    }

    void showID() {
        System.out.println("Name: " + name);
        System.out.println("ID: " + id);
        System.out.println("Department: " + department);
        System.out.println("Institution: " + institution);
    }
}

public class IDCardMain {
    public static void main(String[] args) {
        IDCard student1 = new IDCard("Kowshik Shil", 101, "CCE", "IIUC");
        System.out.println("Student 1 ID Card:");
        student1.showID();

        System.out.println();

        IDCard student2 = new IDCard("Joy Shil", 102, "EEE", "BUET");
        System.out.println("Student 2 ID Card:");
        student2.showID();
    }
}
```
